Installation to the Leviathan-V2 optical

- This cable is designed to be plugged into the leviathan- v2 optical v-2.2 INPUT connector.
- Cable length is 300mm with 2 wires loose ends
- You can attach to loose wires ends micro switch with various functionality, such as:
 - Activate output
 - Toggle output
 - External trigger
 - Burst-3 trigger
 - Empty magazine
 - Virtual reload
- Plug connector into the leviathan INPUT connector - see red circle in the picture
- In the „Leviathan & Scylla by jefftron“ app use interface „External input“ to activate desired function.

WARNING: Installation requires soldering skills. Be careful with routing wires. Damage to the Leviathan will void the warranty.
